RULING ON ENTITLEMENT¹

On June 15, 2022, Ronald Poulin filed a petition for compensation under the National Vaccine Injury Compensation Program, 42 U.S.C. §300aa-10, *et seq.*² (the “Vaccine Act”). Petitioner alleges that he suffered a Table shoulder injury related to vaccine administration (“SIRVA”), as the result of an influenza (“flu”) vaccination received on October 28, 2021. Petition at 1. Petitioner further alleges that he suffered the sequela of his vaccine related injury for more than six months. Petition at 1-2. The case was assigned to the Special Processing Unit of the Office of Special Masters.

On November 2, 2023, Respondent filed his Rule 4(c) report in which he concedes that Petitioner is entitled to compensation in this case. Respondent’s Rule 4(c) Report at

1. Specifically, Respondent states that “petitioner’s alleged injury is consistent with SIRVA as defined by the Vaccine Injury Table. Specifically, petitioner had no history of pain, inflammation, or dysfunction of his left shoulder prior to vaccination; pain occurred within 48 hours after receipt of an intramuscular vaccination; pain was limited to the shoulder in which the vaccine was administered; and no other condition or abnormality has been identified to explain petitioner’s shoulder pain.” *Id.* at 5. Respondent further agrees that Petitioner suffered the residual effects of his condition for more than six months. *Id.*

In view of Respondent’s position and the evidence of record, I find that Petitioner is entitled to compensation.

IT IS SO ORDERED.
